

Caring for a Relined Denture at Home

1. Return back to the office in one (1) week.
2. Rinse the denture after eating and before bed.
3. At Night, keep the denture in a zip-lock bag with a moist paper towel. Put the teeth side down on the paper towel and seal bag.
4. Do not use a brush to clean the denture.
5. You may notice small pieces flaking off during the week, this is normal as the soft reline material shapes to your tissues.
